

MINE.IO

A Holistic Digital Mine 4.0 Ecosystem

25 partners

7 pilot use cases

€14M budget

42 months

Mine.io aims to provide solutions that will build a novel mining digital ecosystem and a systemic structure for the implementation of Industry 4.0 in mining industrial environments.

Digitization of all mine procedures

Waste reduction and reuse

Workload optimization

Increase of energy efficiency and production

Application marketplace

Workflow automation

Environmental footprint reduction

Electrification of underground trucks
